

OVERVIEW OF COVID-19 MEASURES

Our team at VSI Berlin have worked closely with several specialists, ranging from experts in occupational safety and medicine to studio technology and acoustics. Together, we have implemented enhanced safety measures to protect our staff and talent, while maintaining the high-quality dubbing that we are known for.

All of our studios in line with official regulations and recommendations, which not only safeguards both health and safety but enables us to continue our collaborative, efficient and quality dubbing process. Non-studio personnel also continue to work remotely in order to minimise the number of individuals within our facility at any given time.

**All measures were vetted and approved by our advisor
on occupational health & safety.**

For the good of our employees and clients.
This company operates with the
Occupational Health & Safety Standard COVID 19

Acrylic partitions to protect the reception team and visitors. All visitors and staff complete a Covid-19 questionnaire.

Acoustic and disinfectable partitions in all studios between dubbing director & sound engineer as well as voice actor & audio editor.

Disinfection dispensers throughout facility as well as outside main entrances.

Only one voice actor recorded at a time. Strict disinfection routines throughout the facility and in studios between every single voice actor.

Paperless and touchless workflow for actors. Text and context visible on screens.

Recommendations for hand hygiene, disinfection and distancing rules on display throughout the facility. Disposable gloves and masks available.

Dear Ms. Schubert,

Re. Workplace inspection regarding Covid-19 safety measures

Together with members of your team, we conducted a workplace inspection on your company premises on April 1. The aim was to check whether the protective measures you are considering or have already implemented against infection by Covid-19 are sufficient or may need to be extended or supplemented further.

The entrance and waiting area, the common facilities, the sound studios and the offices were inspected and assessed. Safety measures by marking minimum distances, erection of partition walls, use of surface disinfection and, if necessary, disposable gloves, repositioning of furniture and organizational adaptation of work processes were defined and established as measures. Furthermore, we discussed possible procedures in case of unclear symptoms of employees.

In my opinion, the measures taken in this way fully comply with the current recommendations about safety standards at work during the current SARS-CoV-2 pandemic as published by the Ministry for Work and Social Affairs on 16 April 2020.

Sincerely,

Stephan Quentin
